Optimise your Microsoft Lync investment with a video conferencing solution from Lifesize

The Lifesize Lync Bundle is designed to fit the needs of any company utilising Microsoft Lync as their unified communications platform. Offering both dual screen and multiparty video conferencing for the boardroom, the bundle provides end users with a practical and flexible tool for Lync-integrated video communication. In addition to providing an immersive communication environment, the bundle extends the calling reach of Lync video users to other open-standards video systems. Put simply, the Lifesize Lync Bundle is a comprehensive solution designed to optimise your Lync investment and extend your communications reach to your distributed workforce and customer-base alike.

Get the most out of your Lync Investment

Standalone Microsoft Lync

- > Desktop only video
- > Static multiparty video
- > Lync to Lync communication only

With the Lifesize Lync Bundle

- > Organisation-wide video conferencing, regardless of device or location
- > Industry leading continuous presence multiparty video
- > Standards-based: Connect via Lync to any traditional video conferencing system

Lifesize recognises the value of Microsoft[®] Lync[®] to many customers for data collaboration, voice and video.

As an established collaborator with Microsoft, Lifesize have invested in building and strengthening their relationship through interoperability with multiple generations of products. Today, Lifesize provide Lync 2010 and 2013 interoperability through their flagship multiparty calling application, Lifesize[®] UVC Multipoint[™].

Extend your reach with the Lifesize Lync Bundle :

- > Video calling with Lync 2010 and Lync 2013
- > Video conferencing between Lync and 'standards-based' video systems
- > A scalable solution, suitable for any organisation and multiple locations
- > Ability for mobile and remote employees to stay connected
- > Utilises Lync functionality – displaying the presence and availability of virtual meeting rooms

Everyday video conferencing with Lifesize Smart Video[™]

- > Incorporate video into your daily routine with this easy to use system
- > A cost effective solution, allowing video to grow with your organisation's needs
- > Immersive meeting room video - improving communication, driving collaboration
- > Tailored solutions for best-in-class meeting rooms

Maximising open standards video communications

Lifesize Lync Bundle Components

Lifesize Icon

As a dedicated conference room system, the award winning Lifesize Icon offers the Smart Video™ experience - a radically simplified and completely frustration free video conferencing solution. This high definition system is the ideal tool for multiparty collaboration.

With your choice of screen (options available) and wall mount or floor stand.

UVC Multipoint

Designed for ultimate flexibility and scale, Lifesize UVC Multipoint is a software-based multiparty solution for on-demand or scheduled video meetings.

UVC Video Server

As an alternative to running multiparty video calls on a virtualised sever, a UVC Video Server allows all video communication to run on dedicated hardware.

UVC Manager

Lifesize UVC Manager helps video administrators efficiently manage, monitor, schedule and upgrade complex video conferencing infrastructure and endpoints in their own networks and in remote networks behind firewalls.

Lifesize UVC Multipoint

Lifesize UVC Multipoint includes Lync interoperability for seamless connectivity between open standards video systems and Microsoft Lync 2010 and 2013. It offers the flexibility of buying what's needed today and easily scaling when required. Lifesize is the only video conferencing vendor to run a multiparty calling application on industry-standard virtual servers, including Microsoft® Hyper-V®.

“Microsoft’s relationship and joint product development with Lifesize is of great value in our efforts to maximize adoption of unified communications video and collaboration solutions by everyone.”

Giovanni Mezgec,
General Manager for Lync Product Marketing, Microsoft
