

One source for everything email

Mailprotector is dedicated to empowering resellers with a full arsenal of cloud-based email products so they can provide their customers with a robust, secure, & legally compliant email security & hosting platform. **Check out our complete range of products:**

Protect your users around the clock with CloudFilter™ email security. CloudFilter™ effectively stops spam, viruses, & malware in the cloud. Suspicious messages are held in quarantine for review, while good email is delivered to the end user.

Stop bad email from leaving your organisation while staying compliant. When your email users send out confidential files or messages caught as spam, it can severely damage the reputation of your business.

With XtraMail™ your users can keep working through an email outage. XtraMail™ stores a rolling 30 day backup of all your email, so when your systems are down, your users can simply login to XtraMail™ to continue sending & receiving email.

SecureStore™ archives a copy of all incoming, outgoing, & internal email for up to 10 years. You can access your archive anytime to search & send stored mail, & you're free to make changes to your email server without affecting your archive.

ForcEncrypt™ gives you brilliantly simple email encryption at anytime from anywhere. ForcEncrypt™ enables health care, legal, & other professionals to send, receive & track their confidentially email anytime, anywhere on any device.

CloudMail™ gives you an affordable, yet robust email hosting platform which includes contacts & calendars, a large mailbox, & access from anywhere. Manage via secure webmail console or email client via (POP3 or IMAP syncing).

Supercharge your email hosting with the security & reliability of Exchange +. With Exchange +, we've combined numerous layers of security & continuity with the power of Exchange 2013, to give you the ultimate hosted email solution.
